

Wrestling BC Club Registration Options

Choose how Uplifter supports your club operations as an affiliated Wrestling BC club. Clubs can use Uplifter for full registration, use it only to view affiliated members, or submit memberships by bulk import.

Option A - Fully Integrated Club Dashboard

Best for clubs that would like to collect their club fees through Uplifter and manage their members' BCWA membership registration. Clubs can either register their members for BCWA membership on their behalf, or members can register themselves and affiliate with their club. For example, this option is best if your club or team independently charges athletes a yearly, monthly, or weekly training fee - you can collect those fees through the same system where members register for their BCWA membership. This can simplify administration by keeping your club's membership and financial information in one place. If a member does not already have the required membership, they must purchase it before completing the club registration. *Please note that BCWA does not have access to your club's financial dashboard or payment information; this information is only accessible to your club's designated account administrator(s).*

- Collect club fees and Wrestling BC membership fees in one transaction.
- Create your own programs, registration categories, forms, waivers, stores and more
- Access built-in reporting and Excel/CSV exports.

Payment setup and fees: A Paysafe account is required for the club to process online payments through Uplifter.

Uplifter registration processing: \$1.50 per registration

Uplifter payment processing: 2.9% + \$0.40 per transaction

These fees can either be added to the registration fee so the participant pays them at checkout, or the club can choose to absorb them.

Option B - Affiliation Only

Ideal for clubs that collect their club membership fees independently, but still want their members to register with BCWA affiliated under their club. This option allows you to set up your club in the system and have your members affiliated with your club, so when you register for BCWA events, your members are connected to your club and appear under your club name.

- Free access to the list of members who have selected your club as their affiliation when purchasing their Wrestling BC membership.
- Free Excel/CSV exports at any time.
- Members purchase their Wrestling BC membership themselves. The club does not collect club fees through Uplifter under this option.

Option C - Bulk Import (\$120)

Ideal for larger clubs or teams that have many members to register. Bulk Import allows you to upload multiple members at once instead of entering each member individually, helping to streamline the registration process. *Please note, the \$120 set-up fee is a processing fee set by Uplifter - BCWA does not collect this fee.*

- Uplifter provides an Excel import template for the club to complete with member information.
- The completed file is imported to create the memberships in Uplifter.
- The associated Wrestling BC membership fees are automatically added to a club-specific open invoice (payment group).
- The club reviews the invoice and pays it online.
- Built-in reporting and Excel/CSV exports are available in Uplifter.

Uplifter can configure the club portal based on the option selected and provide the next setup steps as needed.
